

New at Dixie—Transfer Tape from American Biltrite

We are now stocking transfer tape from ABI Tape Products, a division of American Biltrite Inc. As you would expect, these products are all “made in the USA!” American Biltrite has been in business since 1908 and operates in three primary industries: Flooring Products (Congoleum), Industrial Products and Costume Jewelry and Fashion Accessories. ABI Tape Products is the world's leading supplier of high quality, high performance pre-mask and application tapes, protective film, paper maskings and pressure-sensitive adhesive tape. We are pleased to represent them in the sign industry.

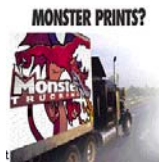

We are currently stocking 300' rolls of their standard TransferRite tape in both medium and high tack. The medium tack is available in widths from 2.25” to 10.5” and high tack in widths from 12” to 48”. The superior adhesive formulation for these products reduces wrinkling, tunneling and edge lift and ensures trouble-free stacking and storage.

Clear TransferRite is also available by special order. It has a unique clear polypropylene film backing with a custom formulated latex pressure sensitive adhesive for decal transfer and pre-spacing.

ProtecRite® Digital Another New and Exciting Product from American Biltrite

ProtecRite Digital is the all-in-one premask and protection tape that prevents damage to your product during fabrication, installation, storage and shipping. It is used to protect large format digital prints as well as large decals that will be rolled and shipped.

Series 6560 is a low tack, 4 mil, lightweight paper that is economically priced and eliminates wrinkling, scratching and lifting.

Series 6882 is a medium tack, 5 mil, heavyweight paper that offers greater dimensional stability and humidity resistance. It is a versatile workhorse.

As we increase our stocked inventory of American Biltrite products, we are interested in your feedback regarding your experience with Clear TransferRite and ProtecRite. How are you using the product and how did it perform for you? If you would like a sample, just call our office.

Roland® Roland Equipment Maintenance and Repair from Dixie

Proper care and maintenance of your Roland equipment is an important aspect of ownership. If your prints aren't as bright, the color is “off” or you are experiencing a mechanical problem, you may need some help. As an authorized Roland Reseller, we have been trained and certified to install and service your Roland equipment. This includes both warranty and “out of warranty” maintenance — for printers and vinyl cutters. We can replace a print head or cap and perform any routine maintenance and repair. If you have a question about Roland supplies or maintenance procedures or if you need service, just give Jason or Shawn a call.
