**New from Alumet Supply Inc.  
ACM Sign Panels**

Aluminum Composite Material (ACM) sign panels are composed of a thermoplastic core of low density polyethylene bonded to two sheets of aluminum. The painted surface of the aluminum sheet is coated with a wax-free high performance polyester coating and is protected with a strippable masking to prevent scratching.

**ACM Sign Panels**

- Light weight but rigid and durable
- Strong and easily fabricated
- Accepts vinyl graphics, screen and digital printing
- Excellent outdoor weatherability
- Available in 2mm, 3mm, 4mm, & 6mm thicknesses

**Akzo Grip-Gard® BC Complete System  
for the Sign Industry**

**SIGN FINISHES**

AZKO's new Grip-Gard BC (Basecoat Clearcoat) Complete System gives you three different product options (Basecoat, Single Stage Converter and Interior Binders) — all using the same set of toners, reducers and hardeners.

This What's Up article features the Grip-Gard BC Single Stage Converter.

**Grip-Gard BC Single Stage Converter** gives you the option of converting the Grip-Gard BC System toners to a fast drying, durable, two component polyurethane. By using the same toners, hardener and reducers, you now have two complete product lines with one set of toners. This means lower inventory requirements—and costs.

The Single Stage Converter enables the fast production of multi-color signs that can only be achieved with a true basecoat/clearcoat product. It also provides a fast-drying two component single stage coating for large one color areas.

Grip-Gard Single Stage Converter has the widest color range (including metallic colors) of any two component product in the market.

**In Summary, the benefits of Akzo's new Grip-Gard BC Complete System include**

- Low initial investment—minimal starting inventories
- Multiple clear coat gloss levels
- Increased production with less prep time
- Fast tape / paint mask times (20 - 30 minutes)
- Fast dry times— Complete coating done in 2-3 hours
- Spray direct to substrate (most plastics, PVCs photopolymers and Flex Face)
- Double color gamut of conventional paint lines

We stock and are able to mix all products in the Grip-Gard BC Complete System. Call Larry or Vic for more details.
