

SA International (SAi) www.saintl.biz

With more than 100,000 customers worldwide, SAi is a leading provider of signmaking and digital printing software for the sign industry. They have offices in the USA, Europe, the UK, China, Russia, Japan, Brazil and Israel and do business in more than 50 countries. We sell and support their full Flexi family and PhotoPRINT family of products

Flexi8

Current version is 8.6

To view Flexi 8.6 and PhotoPRINT 6.0 capabilities lists, go to www.dixiemon.com, click on "Product Catalog", scroll down to Section 13 and click on "SA International Software". PDFs highlighting new capabilities/enhancements are also available for view and print.

FlexiSIGN-PRO offers a total solution for any sign business. It features complete design, contour cutting, color separations, layout nesting, Adobe PostScript 3 for flawless RIPing and printing, Adobe Plug-in support and built-in ICC profiles. Flexi includes new drivers for popular ink-jet, thermal transfer, print/cut devices and vinyl cutters and wide-format printers.

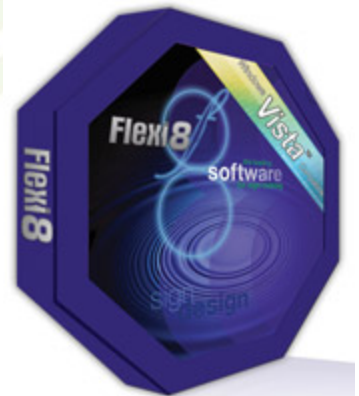

FlexiSIGN-EXPERT is designed for professional signmakers who require comprehensive vinyl cutting tools but don't need the advanced color printing features. It includes full design capabilities, contour cutting, scanning, tracing and vinyl cutting.

FlexiSIGN is basic signmaking software that offers all the design and cutting features needed by any sign business. These include file import and export, black and white scanning, grayscale tracing, full text manipulation and direct drivers for the industry's most popular vinyl cutters.

FlexiPRINT & Cut is a design, scanning and tracing software package with complete cutting output. It has the versatility to RIP and print to two devices simultaneously. Text styles and job statistics are also included.

FlexiLETTER enables designers to create text with shadows and distortions. It includes most of the tools needed to create basic signs and will import most file types. Note: there is no scanning capability in this level of the software.

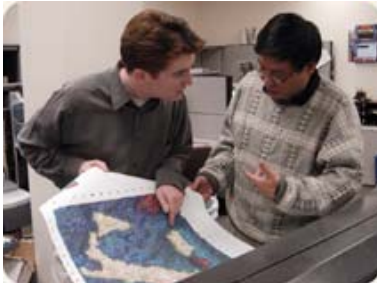

FlexiDESIGNER increases productivity by providing an additional design station that is not connected to your vinyl cutter. It includes all of the FlexiSIGN-PRO capabilities except output. The benefit is that one person can continue design work while another is cutting and/or printing

is a professional digital printing RIP solution that offers versatility, productivity, and quality output. The PhotoPRINT family includes an entry level RIP and print package up to an advanced network printing solution. SAI products include certified Adobe® PostScript® 3, ICC technology, and direct drivers for all major output devices.

- **PhotoPRINT SE** is an entry-level RIP package for single printer, single workstation use. It works seamlessly on Mac and PC platforms through popular design software such as Adobe Photoshop®, Illustrator®, QuarkXpress® or CorelDraw®, and all major CAD/AEC/GIS engineering solutions.
- **PhotoPRINT DX** is a versatile design and RIP package that incorporates essential design tools for users requiring powerful image editing and layout features before sending files to RIP and print.

- **PhotoPRINT SERVER** is a client-server RIP designed for networks and large production environments. It contains the necessary productivity tools to output high volume digital prints quickly and accurately.
- **PhotoPRINT SERVER-PRO** is the client-server RIP with additional capability and cost saving features, such as a color calibration module and an additional design companion called Editor.

SAI Training CDs

- **FlexiSIGN 7 Training CDs – VOLUMES 1 & 2** - This is the first of two volumes for learning FlexiSIGN 7. This training CD is a user interactive and self-paced course that will take all users through the essentials of this awesome graphics program. Each lesson can be played right on your computer and is narrated by Mr. Mark Rugen, SAI's certified FlexiSIGN Training Professional.
- **The Digital Imaging Workshop CD** - This CD is designed for the user that is new to color output. It is an accumulation of many man-hours of internet research compiled into a single CD. Some text prints and targets for calibration are included. Other Topics included scanner, monitor and printer calibration and basic color concepts
- **Flexi Learning Manual - Course No. 101 - You Gotta Know This Stuff!** - This is a self-paced written learning tool. A short booklet highlights specific topics, forms the foundation for future releases and contains essential topics for using and understanding Flexi 7. The student is expected to read and complete the lessons, then be able to answer the review question at the bottom of each page. There is a review exam at the end of the booklet highlighting the main topics.
- **Flexi Learning Manual - Course No. 102 - Smart Objects, Menus & Arranging Them** - This self-paced learning tool is similar to Course 101. This learning booklet focuses on the topic of Smart Objects and how to take advantage of them to accelerate production. Understanding the concept of Smart Object is fundamental to using Flexi 7. This course is required to fully understand Flexi 8 and other releases coming soon.

Flexi MAC 8.5 contains many new features as well as enhancements to many existing features. For more information on Flexi mac, visit www.saintl.biz.

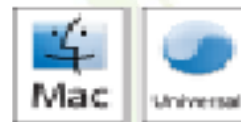

Flexi mac 8.5

Compatible with OSX

Universal Binary application
Compatible with OSX Leopard or OSX Tiger

New Design Features

Fresh Appearance including new icons and a smooth full preview
Customizable shortcut keys
Direct Export of PDF files for customer proofing
Job statistics shows more detailed information about your project
On screen spell checking
Send Native / PDF / JPEG as email
Layer support in import/export

New Production Features

Desktop printing improvements
Apply template for custom job information
DXF / DWG / HPGL import into Production Manager
Cutter driver options per color
Split lines / Weedlines
Specify overcut distance for vinyl cutting to ensure closed shapes

New Color Features

Object color control: view and modify exact output color
On-screen preview
Enhanced Color Management System - includes improved dithering and support for up to 16 color channels

More for Your Mac

New Drivers for the Latest Printers and Cutters
Easier Preset Management - Save, Save As, Rename and Delete are now available as buttons beside the preset selection
Sign Making Fonts and Graphics CD included with both new and upgrade packages of FlexiSIGN and higher

from **ARIES GRAPHICS** www.aries-graphics.com

Aries Graphics is the developer of Neon Wizard, Sign Wizard and LED Wizard signmaking software solutions. All have the necessary tools to improve productivity whether you are cutting vinyl, drawing neon patterns or layout out and estimating LED systems.

Neon Wizard uses a combination of automatic layout features and design tools to create complete neon tube layouts. (Visit [Aries Graphics website](http://www.aries-graphics.com) for a complete list of Neon Wizard and Sign Wizard 6.5 enhancements)

Neon Wizard Standard provides capabilities to:

- Design doublebacks
- Design housings
- Design any number of tubes
- Draw blackouts
- Modify tube diameters
- Move openings
- Rescale the design while keeping the tube diameter constant

The Neon Wizard Plus 6.5 contains all features in Standard — plus

- Scan and vectorize
- Insert tube support holes
- Design raceways
- Export by layers
- 200 high quality fonts
- 15 Auto-connecting script fonts
- Align vertical text
- Support 100 fonts

Neon Wizard Pro 6.5 offers capabilities of Plus 6.5 . . . and more

- Support for Engravers/Routers
- Gradient Filled Tubes
- Presentation Drawings
- Parallel Tube Layout
- Perspective Extruded Shadow
- 400 High Quality Fonts
- Customizable Housings
- Neon Preview
- Channel Letter Returns

Tips . . .

Letter Return Plots

Tired of manually measuring your channel letters to notch and bend the returns? Now Neon Wizard can plot out all the information you need in one quick step -- another huge time-saving feature! **Included in Plus and Pro versions.**

How It Works

When you design a channel letter in Neon Wizard, the program knows all the dimensions of your letters. This feature takes the relevant data and puts it into a format that can be plotted out and easily attached directly to the return. Why do this by hand, a time consuming and error-prone process, when Neon Wizard can do it automatically.

Channel Letter Return Plots

Measures channel letters
Marks location to notch and bend letter return.
Generates return tape pattern
Lines indicate corners; dotted lines indicate angles

from **ARIES GRAPHICS** www.aries-graphics.com

Sign Wizard software is very easy to learn and use. Most sign design involves manipulating text, and Sign Wizard has made

LED Wizard

from ARIES GRAPHICS www.aries-graphics.com

LED Wizard is an add-on feature - **now available for all levels** of Sign Wizard 6.5 or Neon Wizard 6.5.

LED Feature Summary:

- Automatically lays out LED modules within channel letters, similar to Neon Wizard
- Lets you edit each path and adjust each module's position as required
- Follows LED-specific rules about spacing and positioning in the corners
- Keeps track of the total number of modules and power usage per run— listed on screen and/or in an Excel spreadsheet
- Captures Important data for estimating
- Enables data to be linked to an Excel spreadsheet in real time
Exports to PDF at the click of a button
- Gives total wattage to determine power supply
- Allows data capture to integrate with existing workflow
Puts both layout & data in your production drawings
- Offers support for more than 15 LED systems. Contact Aries Graphics for a list of these companies.

Roland DGA is the number one provider of wide-format inkjet printers for the durable graphics market. They offer a variety of printer/cutters and printers as well as digital media and inks. Their wide-format printer line includes aqueous (water-based), eco-solvent, solvent and UV ink printing solutions. **Our focus at Dixie Neon is to offer selected eco-solvent printer/cutters and printers as well as UV ink printers that we believe best support the business objectives of our customer base.**

Roland wide-format printing solutions available from Dixie Neon Supply Co.

In the sign and graphic arts industries, Roland is widely recognized as the leader in the development of integrated print/cut technology. Their solutions facilitate a one-step seamless production cycle for high-resolution printing and contour cutting. This integration is required to produce sophisticated sign graphics as well as custom labels, decals and vehicle graphics.

Print/cut Solutions (Eco-solvent Inks)

Roland's wide-format printer/cutters include the best-selling VersaCAMM series as well as the 54-inch SOLJET PRO III XC-540 which has won numerous industry awards. In 2009, Roland announced the "i" versions of the VersaCAMM VP series. These included the 30" VP-300i, the 54" VP-540i, the 30" SP-300-i and the 54" 540-i. These enhanced "i" series printers feature Roland's Intelligent Pass

Control technology which allows users to achieve the same image quality at significantly higher speeds. In late 2009, they announced the SOLJET PRO III XC 540 MT, which was developed for use with their award winning metallic silver ECO-MAX ink. In February, 2010, Roland introduced the VersaCAMM VS-640, the world's First 64" Inkjet Printer/Cutter with a Metallic Ink Option.

Print/Cut Solutions (UV Inks)

The Roland VersaUV LEC-300 was announced in September 2008 and is the world's first UV inkjet printer/cutter. It is environmentally friendly, uses safe, low-heat LEC lamps and prints CMYK + White + Clear (coat). You can select from hundreds of media options including flexible specialty substrates. VersaWorks RIP software is included for easy setup and operation.

Printing Solutions (Eco-Solvent Inks)

We offer three series of Roland printers:
SOLJET PRO III XJ 540 (54"), 640 (64"), 740 (74") and XC 540MT (54")
SOLJET PRO II V SJ 645EX (64") and SJ745 EX (74")
The NEW VersaArt RS Series available in 54" and 64" models

A comparison of Roland printer/cutters and printers offered by Dixie Neon follows on the next two pages.

AQUEOUS (WATER BASED INK) WIDE-FORMAT PRINTERS

www.canonusa.com

Canon's imagePROGRAF line of wide format printers includes models ranging from 17" to 60" wide. Their 1.07-inch print head with a total of 7,680 nozzles results in uncompromising speed and quality. The imagePROGRAF iPF5100 17" and imagePROGRAF iPF9100 60" 12 color printers both received 2006 DPI Product-of-the-year awards: the iPF9000 for poster size output and textile printing, and the iPF5000 for presentation size output. These awards are given to digital imaging products that have had a positive impact the industry in the past year

Canon imagePROGRAF IPF line of wide-format printers

Printer(s)	Media Width	Colors	Notes
iPF5100	17"	12	Ideal for fine art, photography, banners, exhibits and posters.
iPF6100	24"	12	Ideal for fine art, photography, banners, exhibits and posters.
iPF8100 iPF8000S	44"	12	Ideal for fine art, photography, banners, exhibits and posters.
iPF9100 iPF9000S	60"	12	Ideal for fine art, photography, banners, exhibits and posters.

Canon imagePROGRAF Technical Document and General Use Printers

Canon's line of Corporate and CAD printers feature a unique five-color dye/pigment ink set and produce drawings, documents and presentations that are accurate, bold and compelling. These printers are available from Dixie Neon by special order. Please visit www.canonusa.com or call us for more information.

VINYL CUTTERS

www.ioline.com

Ioline Corporation is a leading designer and manufacturer of cutters and ultra-wide pen plotters for the sign industry. Founded in 1984, they are the largest domestic manufacturer of signcutting equipment and have developed a reputation for quality, consistency, and value in signmaking equipment. Ioline products are designed and manufactured in the USA and their 100% warranty is one of the longest in the industry.

SmarTrac Series (I/S60, I/S85, I/S110, I/S130)

The SmarTrac series cutters are “out of the box” up and running in less than 30 minutes with tracking accuracy tested to 150 feet. Precise cutting of small characters (1/10 inch), from a revolutionary friction free head, tested to 300,000,000 cycles. The SmarTrac will draw and pounce paper patterns and will cut all popular signmaking materials. It is also able to draw directly on banner material and, through manual alignment with the printed registration marks, "contour-cut" images produced on ink-jet and thermal resin equipment. All models include Ioline’s exclusive Blade Saver strip to guarantee maximum life from each blade. The newly designed Multi-Tool Jaw provides quick change-over from cutting to drawing to pouncing -- and is capable of using standard markers and pens available from any office supply store.

Ioline™ SmarTrac™ Signcutters

Cutter	Max Media Width	Max. Cutting Width	Max. Cutting Speed	Down Force	Warranty

Camm-1 Servo GX-24 Desktop Vinyl Cutter

In addition to Roland’s legendary reliability, the new **CAMM-1 Servo GX-24** desktop vinyl cutter offers enhanced productivity and quality. Powered by a digital servomotor, it achieves cutting speeds up to 20 inches per second and maximum accuracy. Vehicle graphics, signs, decals, labels, stencils and even pinstriping always come out looking crisp and clean.

GX Pro Vinyl Cutters (GX-300, GX-400, GX-500)

An advanced digital control servo motor and 32-bit RISC CPU gives the CAMM-1 PRO unbeatable cutting performance. Designed to produce signs and displays at high speeds with unmatched accuracy, the CAMM-1 PRO minimizes set-up time by storing settings and parameters for the materials most frequently used. The Pro Series comes with a dedicated stand and sheet roll holder in addition to a newly developed feed mechanism. Once a vinyl roll of up to 50 yards in length is loaded, continuous cutting of multiple designs or large-scale signs and banners can be produced with unattended operation.

Roland Stika Cutter Series

The Stika Series of cutters is designed for sign makers who are not going to cut large numbers of vinyl signs, but need to occasionally cut vinyl to enhance other areas of their business. They will cut vinyls, reflectives, paint mask, twill, heat transfer and etching material. The Stika Cutter comes with Roland CutStudio software which enables you to reduce, re-position, rotate, tile and mirror images. It enlarges images as crisp as original size and cuts TrueType fonts without outlining. CutStudio also supports BMP, JPG, STX, AI, and EPS file formats. Corel-Draw and Adobe Illustrator plug-ins are included for Windows 98/SE/ME/2000/XP as well as an Adobe Illustrator plug-in for Mac OS9. While we do not stock these cutters, they are available for immediate delivery.

Model	Max cut area	Max media width
SV-8	6.2" x 39 5/16"	8 1/2"
SV-12	9.8" x 39 5/16"	12"
SV-15	13.3" x 29 5/16"	15"

www.graphotecamerica.com

Graphtec America (formerly Western Graphtec) has produced high quality vinyl cutters since 1977. Today, they offer a full line of vinyl cutters and inkjet printers -- all carrying their bullet-proof support guarantee.

CE5000 Cutters

Graphtec's newest introduction into the sign cutting market is the E-Class (engineering class) cutter. Available in a 24" model, it is perfect for individuals seeking Graphtec's high quality and reliability while being very affordable. The 54" model accommodates jobs requiring a large cutting width and is excellent for shops that cut all types of vinyl, fluorescent film, reflective film, Amberlith™ and Rubylith™.

Model	CE5000-60	CE5000-120
Max. Cutting width	23.7"	47.8"
Max. Material width	2" - 28"	3.3" to 53"
Cutting Speed	24 IPS	40 IPS
Max Cutting Pressure	20-300g	20-450g
Media Movement	Friction	Friction
Cutter Stand	Standard	Standard

FC8000 Series Cutters

Graphtec's redesigned FC8000 Series is packed with new features and is available in five sizes, ranging from 24" to 64".

Cutting Plotter Controller Software Utility

- . Control functions of the FC8000 from your computer.
- . Obtain cutter settings and make adjustments remotely.
- . Save and share tool conditions and information with other users.

Next-Generation ARMS (Auto Registration Mark Sensor) System

- . Sensitivity adjustment enables registration mark detection on various media and colors.
- . Adjustment for potential print distortions results in accurate contour cutting of pre-printed images.
- . Optical sensor provides for auto alignment.

Three Push-Roller Pressure Settings

- . Strong – cuts sandblast mask and high-intensity reflectives.
- . Medium – cuts vinyl.
- . Light – cuts window tint film. (standard on 42", 54", and 64" models)

Optional Ethernet Interface (also includes USB 2.0 and RS-232 Serial)

- . Ethernet Interface allows one PC to run multiple FC8000s.

Dual Configuration Function

- . Two different users can set & save independent settings for customized jobs on a single FC8000 machine.

FC8000 Series Vinyl Cutters

Each unit includes a standard media roll rack, floor stands and dual media catch basket for dust-free, continuous long length and/or repetitive job operations.

Model	Max. Media Width	Max. Cut Width	Cutting Speed
FC8000-60 24"	30.3"	28.7"	58.5"/Sec.
FC8000-75 30"	36.2"	35.5"	58.5"/Sec.
FC8000-100 42"	48.2"	47.5"	58.5"/Sec.
FC8000-130 54"	60.2"	59.5"	58.5"/Sec.
FC8000-160 64"	72.5"	69.5"	58.5"/Sec.

Craft ROBO Pro

The Craft ROBO Pro is based on Graphtec's CE5000 series of professional cutting plotters.

The Craft ROBO Pro has a maximum cutting width of 14.8" (takes media up to 19" wide), with a max cutting speed up to 16" per second, and a cutting force up to 300gf. With such a fast, accurate and versatile **desktop cutting plotter**, you can contour cut most any media pre-printed—from your choice of inkjet, solvent based and laser printer.

Craft ROBO Pro is perfect for all kinds of media cutting applications including vinyl, heat and image transfer media, card stock, contour cut stickers, labels, wrappers, hang tags, scrapbooking, architectural modeling, stencil cutting for paint masking and etching masking, plus many others applications.

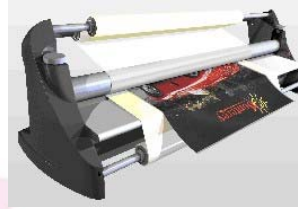

Mock-ups and comps of packaging and designs can all be done at your desktop without the wait and cost of custom dies. The Craft ROBO Pro's Auto Registration Mark Detection commands contour cuts (die cuts) directly from Adobe Illustrator® with the included *Cutting Master 2 plug-in.

*Cutting Master 2 is GRAPHTEC'S software plug-in that allows you to design and cut directly from Corel-Draw® or Adobe Illustrator®.

LAMINATORS

www.daige.com

Daige has manufactured laminators for more than 35 years. Their Quickmount IV, introduced in 2006, replaces the Quickmount III series and is available in four sizes: 25", 38", 55",

www.sealgraphics.com

SEAL has been in the image finishing business for more than 30 years and we believe their laminating products offer quality, performance and value.

Other Seal laminators may be ordered on request.

Model	Description
Seal® 54 Base	Mounts and laminates graphics up to 55" wide. Heat assisted top roller. Speeds up to 16.4' / min.
Seal 62 Ultra	Mounts and laminates graphics up to 61". Speed up to 10' / min.

www.royalsovereign.com

Royal Sovereign cold laminators are available from Dixie Neon.

RSC-1400C - Laminates pressure sensitive films up to 55 in" at speeds up to 16.4 ft/min. This laminator has digital controls for speed combined with silicone rubber rollers – for a perfect finish. Film supply shafts are equipped with auto-grip hubs to allow quick and easy replacement of lamination roll film.

RSC-1400H – Same as RSC-1400C with added top roller heat assist.

RSC-1400L – Same as RSC-1400C with 50% larger diameter laminating rollers.

GROMMET TOOLS

Fasnap Corp www.fasnap.com

Fasnap® Corp. offers a complete product line of high-quality fasteners, tools, and machinery for standard or custom fastening systems. We carry their PM-5 grommet tool as well as the # 2 die and # 2 grommets (in nickel and brass).

Grommet Machine Package

Description	Unit of measure
PM-5 Grommet Machine, iron, bench mount	1
# 2 3/8" Die set for PM-5 grommet tool	1
# 2 3/8" Self piercing grommets	Bag of 500

Grommets can be purchased in bags of 500.
